School of Computing and Information

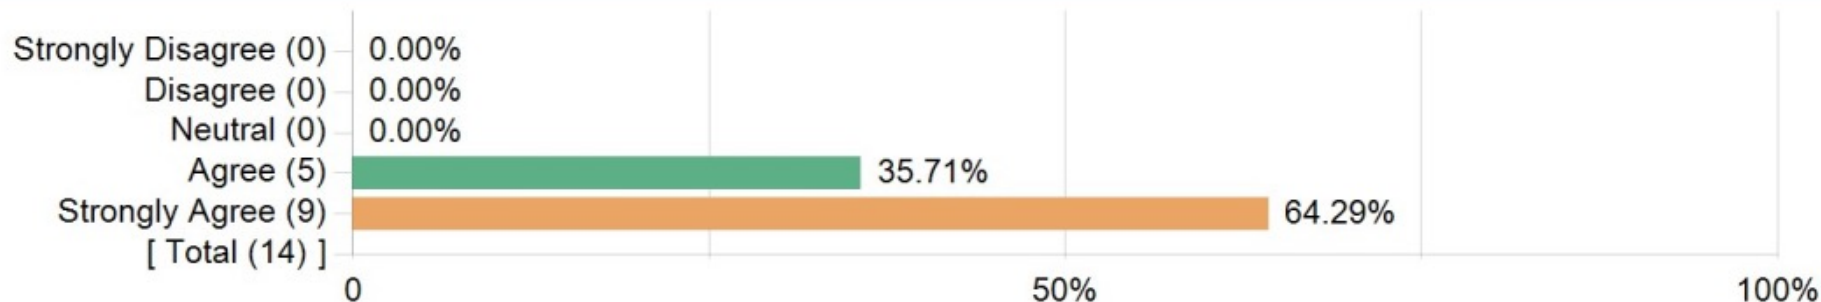

Class has been mostly successful

I am developing the skills I need in this class.

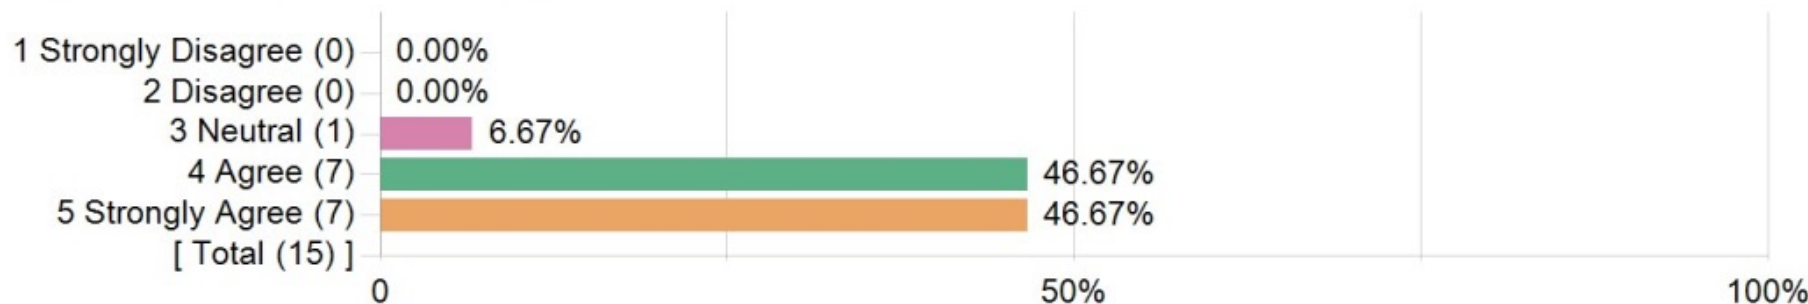

I am developing the skills I need in this class.

Statistics	Value
Mean	4.64
Standard Deviation	0.50

This class stimulates my interest in the subject.

This class stimulates my interest in the subject.

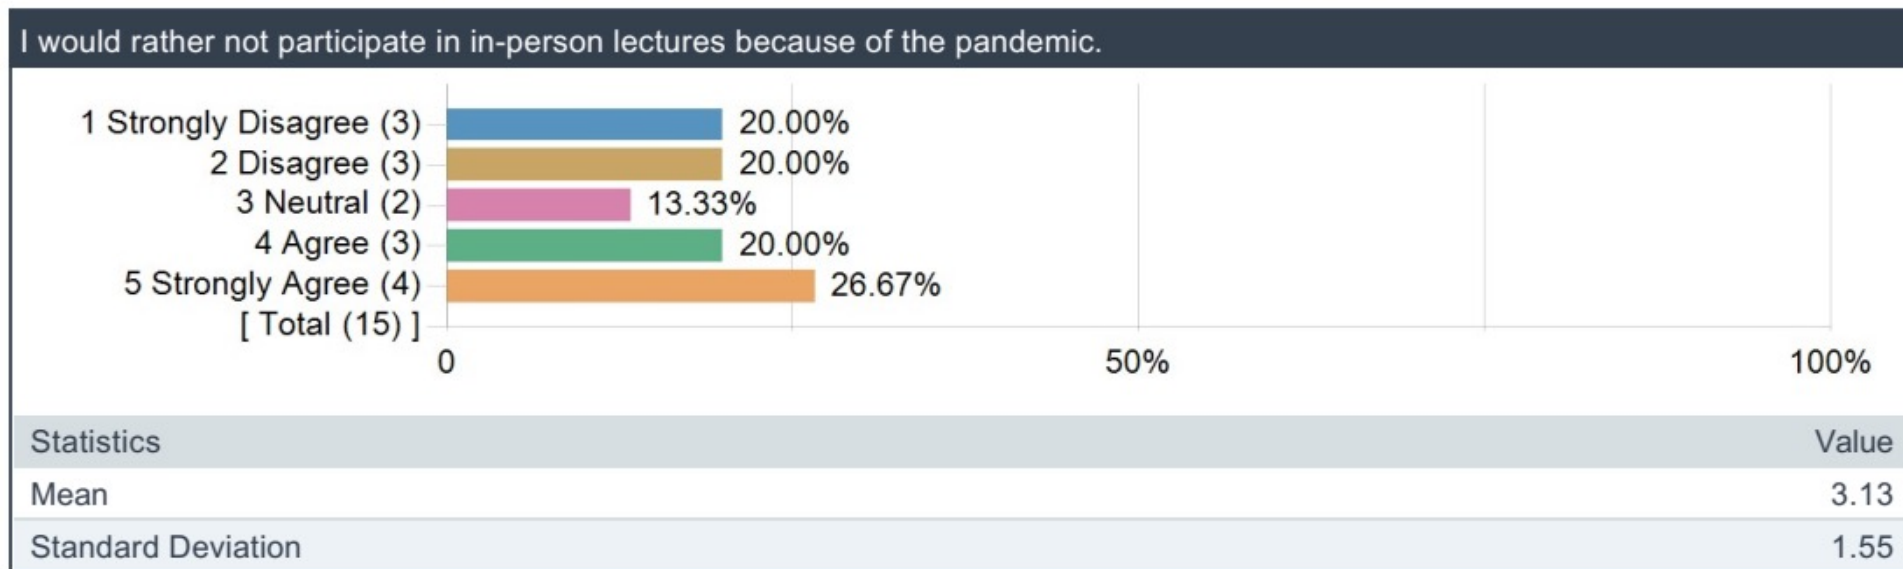

Statistics	Value
Mean	4.40
Standard Deviation	0.63

Pandemic seems to be depressing attendance

I would rather not participate in in-person lectures because of the pandemic.

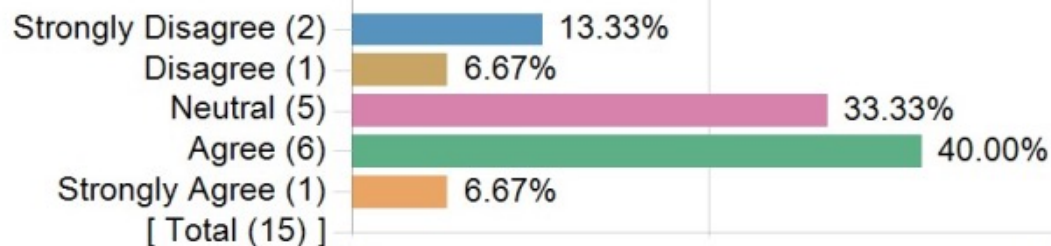

- Almost equally divided in opinion about in-person
- Just hope the pandemic goes away quickly

Flipped classroom is mostly favored

I like the flipped classroom format compared to traditional lectures.

I like the flipped classroom format compared to traditional lectures.

Statistics	Value
Mean	3.20
Standard Deviation	1.15

- Mostly in favor, but some are strongly against it.

Course Corrections

■ High course load

- Takes a lot of time to listen to lectures
- Too many exercises and not enough class time to do them
 - Will try to give more in-class time to do exercises
 - Will waive a couple of exercise submissions towards the end

■ Lack of interactivity when listening to lectures

- Cannot ask questions because lectures are off-line
 - I understand this is not ideal. It is a trade-off.
 - You can ask questions on the Teams General channel
 - You can ask me through Teams chat if you are really shy
